

I use satalite radio to plan trips and avoid traffic tie ups . I'm a large truck owner /operator and instant traffic and weather saves me time by using it. Also I find it to be a saftey factor as I only have to use my remote to go to a station where I know the information is and not have to search for it. xm Radio is the best thing Fcc has allowed to air. Please don't turn my traffic/weather off . I feel forcing this information off the air ways would be a sencership that is not needed at this time as I am a willing member and pay my dues for this service
